

# PTI - The Leader in FFELP Technology

---

## Being the leader takes commitment

PTI is the leader in the delivery of advanced software technology solutions to the FFELP industry. We are committed to the industry, our clients, and the productive use of advanced technology. Our commitment to the industry is best exemplified by our extensive contributions to the Meteor project and the strong partnerships we have formed with other industry leaders, such as NCHELP and the National Student Clearinghouse. This experience and level of commitment is also brought to our clients. PTI's products and services empower our clients with advanced technology solutions to meet their unique objectives.

---

**“Technology drives productivity, and productivity drives the wealth of the nation.”** *Jack Welch, Former CEO of General Electric*

---

## PTI is Committed to the *FFELP Industry*

It is PTI's mission to empower the industry with the technological tools needed to improve productivity and quality of service. PTI thanks NCHELP and those of the Meteor Advisory Team that contributed their time and talent to making Meteor such a success. PTI looks forward to continuing work on other technical initiatives for the FFELP industry.

---

## PTI is Committed to *Our Clients*

PTI empowers our clients with advanced technology. Our industry experience and proven development process allow us to discover your unique needs and apply the technical solution that best meets your business objectives.

Ask Julie Kubisiak of SLND and Paula Carlson of EAC about how PTI has empowered their agencies with services and products.

---

## PTI is Committed to *Advanced Technologies*

PTI embraces the application of advanced technology. PTI's proven process integrates our clients into the solution. Together, we discover a strategy that meets your business objectives, detail the requirements and design, and implement a solution that transforms your business.

Our products are an embodiment of our success with technology. Our Priority Guaranty Solutions is based upon the latest techniques, being modular, portable, and flexible enough to meet your unique objectives.
